Algonquin College is a leader in the Canadian college community. With campuses located in the Nation's Capital and Ottawa Valley, Algonquin is the third largest college in Ontario. A recognized innovator and visionary, the college is driven by a bold sense of vision – to lead, partner, innovate and excel. As part of this college vision, the College's Office of Applied Research and Innovation facilitates research partnerships by bringing students, faculty, staff and funders together with industry and community organizations.

Mr. Fisher is responsible for new venture creation at Wesley Clover, a Terrence Matthews company. He currently manages a portfolio of assets in both the ICT and media sectors. In addition, Andrew runs the Mitel Affiliate program that is responsible for identifying and commercializing gaps in existing portfolio investments.

Dr. Hofstra has a B.Sc. (Chemistry), a Ph.D. (Engineering Physics) and his CFA designation. As a holder of numerous patents, a former employee of a pre-IPO company, and an investor, he is well-positioned to manage Greenrock's investment portfolio in the clean tech industry.
