

# Partners in a Powerful Ontario

## Building Tomorrow's Workforce

One of the 10 largest electricity transmission and distribution systems in North America, Hydro One owns and operates Ontario's 29,000 kilometre high-voltage transmission network that delivers electricity to large industrial customers and municipal utilities, and a 122,000 kilometre low-voltage distribution system that serves about 1.3 million end-use customers and smaller municipal utilities in the province.

Throughout the province, every day more than 4,500 people at Hydro One keep the lights on, men and women working to improve the existing electricity infrastructure and connect to new sources of clean generation.

In order to ensure Hydro One can meet the current and future demands for a skilled workforce, the Company has entered into an innovative partnership with four Ontario Colleges:

- Algonquin
- Georgian
- Mohawk
- Northern

All four Colleges will work to attract and educate future employees for the electrical transmission and distribution utility sector. Hydro One will invest in the development of curriculum, adjusted or new programming, employment strategies, and equipment for training purposes. Bursaries and scholarships will encourage young graduates to become a bright part of Ontario's current and future electricity industry.
