So, you have another assignment...

Can you use generative AI?

1 Know if you can use it →
- Read the assignment instructions. Each may have different requirements.
- Know if you are allowed to use GenAI and what it can be used for.

2 Understand the tool →
- Understand its capabilities and its limitations.
- It has lots of potential for great things, but it also has biases and flaws.

3 It's a tool, not a crutch →
- Generative AI should complement the learning process, not replace critical thinking skills.

4 It's not error-proof →
- Generative AI can invent information and sources. Don't trust it.
- Verify information for accuracy.

5 Maintain academic integrity →
- Cite properly.
- Guard against academic dishonesty.
- Be familiar with the Academic Integrity Policy.
