

# ENHANCED SERVICES FOR APPRENTICESHIP STUDENTS

Algonquin College is committed to providing the best possible education for all of our students. This includes meeting the needs of apprentices with disabilities who may require accommodations for their success.

## DID YOU FIND SCHOOL TO BE DIFFICULT?

If you had a history of receiving help in school, please contact Gordon McGregor at (613) 727-4723 extension 2937 and he will assess your needs. It would be helpful if you brought your documentation (medical note, psychological report etc.) to the first meeting. Some of your concerns may include reading speed, memorizing facts/formulas, spelling and grammar, organization and/or note-taking. At the meeting he will:

- Identify strengths and weaknesses.
- Talk about strategies that will help you be the best you can be.
- Connect you to the right help.

## OUR SERVICES ARE FREE AND CONFIDENTIAL AND MAY INCLUDE:

**Adaptive Technology:** Specialized hardware and software such as Talking Dictionary, Kurzweil, Dragon, laptops etc. will ensure access to your entire curriculum and academic requirements. An adaptive technologist is also available to determine your needs as well as provide on-going training.

**Textbooks on CD:** Some of our students have found it very helpful to have their material put on CD that will assist them with reading.

**Tutoring:** Gordon will help to ensure that specialized tutoring is available, e.g. one-on-one or group tutoring for licensing exam preparation.

If you have a documented learning disability, medical or mental health condition, physical, visual, hearing or mobility impairment, we will make every reasonable effort to accommodate your needs to meet the learning outcomes of your in-school Apprenticeship program, and to provide equal access to college services. As an Algonquin College student, you have access to all of the Student Support Services that we have to offer.

## OUR GOAL FOR YOU IS TO BE SUCCESSFUL
