Viewing One Student at a Time in the Grade Center

Once in a while you need to show the Grade Center to the student without exposing other students’ information. You can view one student at a time.

Here’s how:

1. Log into your course and ensure Edit Mode is ON.
2. Click on the Evaluation area of the Control Panel then select Grade Center in the expanded menu.
3. On the Grade Center page, click on the Chevron of the first or last name of the student you’d like to display.
4. Select Hide Other Rows. You should now only have one row displayed now.
5. To go back to display all of students at once, click on the Chevron of the first or last name of the only student and select Show All Rows.
