

## Asbestos Management Plan

Please be advised that the most recent copy of the Algonquin College Asbestos Management Plan and Lab Results are posted on the Facilities Management Forms website.

Based on information provided by Algonquin College, InAIR Environmental Ltd. deemed the following buildings as potentially having Asbestos Containing Materials (ACM). Woodroffe Campus Buildings "WA" (Which includes the Central Heating Plant and the interconnecting tunnels), "WB", "WC" and "WD". The following buildings were deemed to be ACM free. Centre Point Campus Building "CA", Woodroffe Buildings "WE", "WF", "WG", "WH", "WJ", "WK", "WM", "WN", "WP", "WR 1,2 and 3", "WS", "WT", "WV" and "WZ".

All readers of this report are reminded that potentially hazardous substances may be present in any disturbed material and all appropriate measures must be taken to ensure safety protocols are being followed.

Should any individual encounter a material that they feel may be an ACM they should immediately report it to their supervisor who in turn shall report it to the manager of Facility Operations and Maintenance (FOMS) Team. In accordance with Ont. Reg. 278/05 any operation that may expose a worker to asbestos are classified as Type 1, Type 2 and Type 3 operations and all involved workers must receive the appropriate training by a competent person. Please refer to the referenced regulation for more comprehensive information.

Thank you,

Facilities Management
