

COVID-19 is placing stress on Canada's public health system. Our clinic is starting to offer virtual care to make sure that we can continue to care for our patients safely and effectively. This means that we will be using video and audio technologies for some patient visits rather than asking all patients to come into our office. Some of these technologies are provided by the Province. Others have been provided by vendors to help make discussions with your care provider as easy as possible during these difficult times. Some health concerns can be addressed with virtual care alone, but in some cases your doctor may ask you to visit a hospital or other health care facility if necessary, for a physical examination.

We do our best to make sure that any information you give to us during virtual care visits is private and secure, but no video or audio tools are ever completely secure. There is an increased security risk that your health information may be intercepted or disclosed to third parties when using video or audio communications tools, if not managed properly. Therefore, to help us keep your information safe and secure, you can:

- Be very careful about suspicious emails or texts. If you are uncertain about the email's origin, use a phone to call the originator using a known phone number, not a phone number provided in the email or in text message.
- Use a private computer/device (i.e., not an employer's or third party's computer/device), secure accounts, and a secure internet connection. For example, using a personal and encrypted email account is more secure than an unencrypted email account, and your access to the Internet on your home network will generally be more secure than an open guest Wi-Fi connection.

You should also understand that electronic communication is not a substitute for in-person communication or clinical examinations, where appropriate, or for attending the Emergency Department when needed (including for any urgent care that may be required).

If you are concerned about using video or audio tools for virtual care, you can ask our office to arrange for you to visit a different healthcare provider or other health care center where you can be seen in person. However, please note that visiting a health care provider in person comes with a higher risk of coming into contact with COVID-19 and the possibility of spreading the virus.

By providing your information, you agree to let us collect, use, or disclose your personal health information, such as name, date of birth, health conditions and health history, through video or audio communications (while following applicable privacy laws) in order to provide you with care. The following means of electronic communication may be used: telephone, email, text messaging, and/or videoconferencing.

For more details on our privacy practices please visit
<https://www.algonquincollege.com/healthservices/privacy/>.

If it is determined you require a physical exam you may still need to be assessed in person.
Are you ok to continue?
