

**ALGONQUIN COLLEGE INFORMATION SECURITY
PRESENTS**

CYBER SECURITY DAY

PROGRAM GUIDE

FRIDAY, OCTOBER 3, 2014

**ALGONQUIN
COLLEGE**

Thank you for attending the first annual Algonquin College Cyber Security Day!

October 2014 marks the 11th Annual National Cyber Security Awareness Month. Sponsored by many government entities including Get Cyber Safe (www.getcybersafe.gc.ca) in Canada and the National Cyber Security Alliance (www.staysafeonline.org) based in the United States, it is a fast growing, international event: government departments, corporations, non-profits, educators and many organizations and their staff participate in many different ways.

The intent is to engage and educate public and private sector partners through events and initiatives with the goal of raising awareness about cyber security and increasing the data safety of people, organizations and governments.

In our inaugural event, we are fortunate to have speakers and sponsors that are active in the Cyber Security community.

Please make sure to:

- Welcome and say hello to our future cyber security leaders—our students from various educational institutions participating today
- Visit our sponsors in the trade show area to see their *global leading* solutions—many are recruiting for a variety of high technology cyber security careers
- Visit our Algonquin College organizations including Applied Research, Corporate Training, and Ancillary Services
- Check out and try your luck at our *Hacking Village* located at the RCGT Booth
- Take in the free refreshments and lunch courtesy of **Fortinet**, our Platinum Sponsor

Nelson Mandela said *“Education is the most powerful weapon which you can use to change the world.”* Let’s change the world a little bit today by freely sharing new ideas, learning something new, asking questions and each person taking a small step forward in protecting our shared cyber environment

Sincerely,

Craig Delmage and Patrick Ouellette
