

Cyber Security Days 2.0

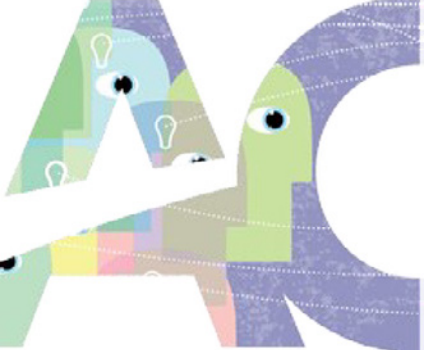

Privacy Risks and the Impact on You

PROGRAM GUIDE

February 24, 2016 – 7:30am - 4:30pm

February 25, 2016 – 8:30am - 4:00pm

Welcome!

Building on the tremendous success of last year's Cyber Security Day 1.0 conference, the premier National Capital cyber security event brings together Algonquin College and its partners from education, high technology, private sector, and the federal government.

Canada's pre-eminent thought leaders, authors and researchers, attend from across the country to share ideas on current topics in cyber security, privacy, youth and cyber, dark actor tactics, as well as the state of cyber security and privacy careers.

The intent is to engage and educate public and private sector partners through events and initiatives with the goal of raising awareness about cyber security and increasing the data safety of people, organizations and governments.

Please make sure to:

- Welcome and say hello to our future cyber security leaders—our students from various educational institutions
- Visit our sponsors in the trade show area to see their global leading solutions—many are recruiting for a variety of high technology cyber security careers
- Visit our Algonquin College organizations
- Check out and try your luck at our Hacking Village
- Take in the free refreshments and lunch

Nelson Mandela said “Education is the most powerful weapon which you can use to change the world.” Let's change the world a little bit by freely sharing new ideas, learning something new, asking questions and each person taking a small step forward in protecting our shared cyber environment

Sincerely,

Craig Delmage,
Event Chair

PROGRAM DAY 1: Industry Trends

Time	Presenters and Topic
07:00 – 08:30	Registration Starts / Information Desk / Trade Show Setup
