## Balcony View (2022)

This is a concept illustration for a character I have been developing over the past few years. She is an urban witch named Jade that lives with her cat familiar. With this piece I wanted to illustrate a moment of calm, I used the purple hue that I associate with her design throughout the piece to create harmony.

Digital - 3240 x 4050 px

Below I have included some older artworks of Jade, to show how she has developed over the years. The first two are from 2020, the bottom is from 2021.

### **Blossoms (2023) process images**

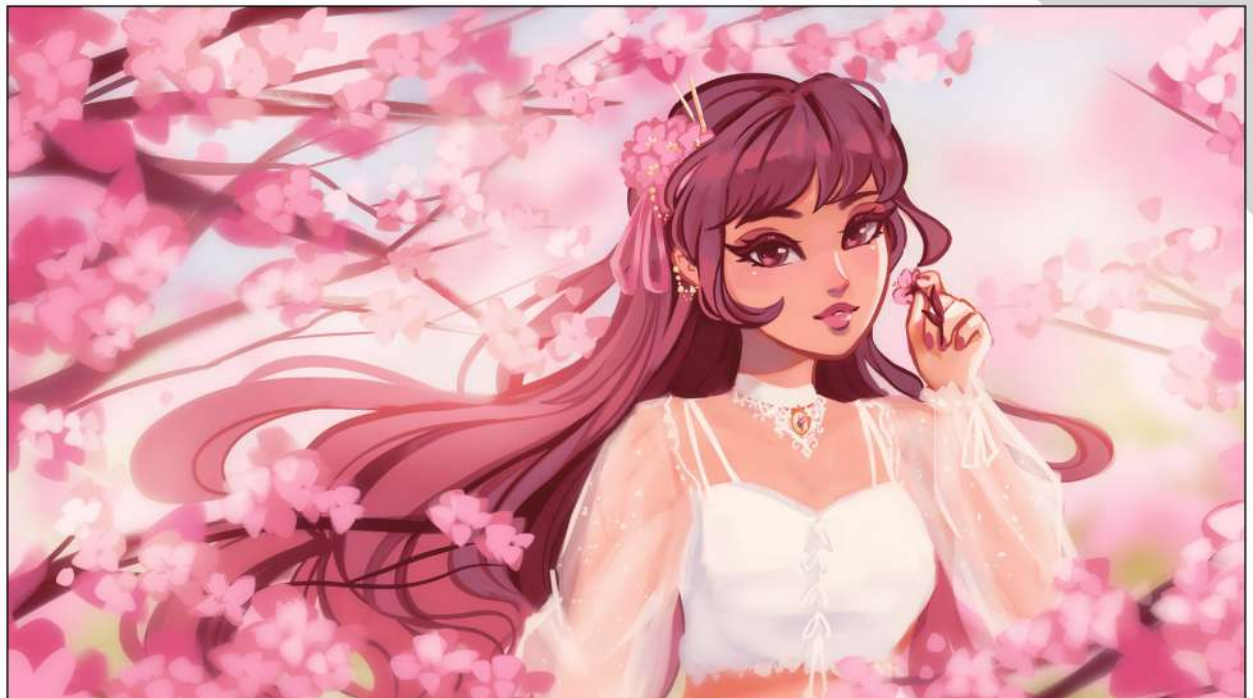

On the left you can see my initial sketch for the character, and the right image is my basic blocking in for the piece. I decided to add the sleeves later on to separate the character a bit more from the background. I also added more foreground elements in the end piece.

### **Blossoms (2023)**

Here I created a character based on the feeling of springtime, my favourite season. I wanted to stick with a mostly pink palette, using whites, yellows, and greens as an accent.

Size: 8.5 x 11in

Date: 01/23

**Sunshine in the Rain  
(2022)**

Here I drew a rainy city scene. I used mostly grey colours for the background and character, and added interest with the golden yellow colour of her umbrella and dog. The yellow represents the sunshine after the rain.
