Just before the meeting starts, select the Meeting URL link. If you have participated in Zoom meetings before on your laptop/desktop, then you won't need to install or download anything – it should just open for you and you can join. If you have not used Zoom before, it will prompt you to download the Zoom meeting component – it's quick to download.

You can join using your laptop/desktop audio – if you have a microphone hooked up. If you do not, call in using the Canada number in the Zoom email – it will ask you for the meeting ID – also included in the email.
