Purpose and Application

The delivery of programs of instruction is the core business of colleges of applied arts and technology in Ontario. As defined in O. Reg. 34/03 under the Ontario Colleges of Applied Arts and Technology Act, 2002, a program of instruction means a group of related courses leading to a diploma, certificate, or other document awarded by the college.

The Act identifies the colleges’ objects or mandate to offer a comprehensive program of career-oriented, postsecondary education and training that:

- assists individuals in finding and keeping employment;
- meets the needs of employers and the changing work environment; and,
- supports the economic and social development of their local and diverse communities.

This binding policy directive applies to all colleges of applied arts and technology and defines expectations for all programs of instruction offered by colleges regardless of the funding source, except for ministry-funded apprenticeship training.

The binding policy directive came into effect on April 1, 2003.

The Post-secondary Education Choice and Excellence Act, 2000 provides the authority for colleges of applied arts and technology to apply for ministerial consent to offer applied degrees subject to the terms and conditions established under the legislation and by the Minister.

For further information regarding this binding policy directive, click on the Contact link to consult with the appropriate ministry contact, listed in the Contacts section on the web site.

Principles

- Colleges play a major role in the achievement of economic prosperity in the province of Ontario through the provision of programs of instruction that prepare graduates to meet the needs of the workplace, the economy, and society.

- A college is best positioned to determine the programs of instruction it should offer based on its own strategic direction and the needs of its community.
A college is also best positioned to ensure the ongoing relevance and quality of its programs of instruction.

- A college is best positioned to determine when it can better serve its students preparing them to meet the needs of the workplace, the economy, and society offering programs in partnership or other cooperative arrangement with other entities, including private career colleges, that are legally authorized to offer postsecondary educational programs.

- Credentials awarded in the college system must be credible and meaningful and understood by, students, employers, and the general public.

- A college’s decision-making processes can be made more effective by enabling students, external stakeholders, and college staff to provide advice relating to the development, establishment, delivery, and review of its programs of instruction.

- All advertising and marketing of college programs must reflect transparency and accuracy.

Glossary

Co-op diploma apprenticeship program: a program of instruction that combines the elements of an Ontario College Diploma and an apprenticeship trade program and leads to the awarding of an Ontario College Diploma and a Certificate of Qualification for a specific trade. This integrated program includes both in-school training as well as on-the-job training based on ministry-approved standards.

Prior learning assessment and recognition (PLAR): a process that uses a variety of tools to help learners reflect on, identify, articulate, and demonstrate past learning. Prior learning can be acquired through study, work, and other life experiences that are not recognized through formal transfer of credit mechanisms.

- Challenge process: a method of assessment, other than portfolio assessment, developed and evaluated by subject-expert faculty to measure an individual’s learning achievement against course learning outcomes. The process measures demonstrated learning through a variety of written and non-written evaluation methods for the purpose of awarding credit without requiring enrolment in a course.
Portfolio assessment: a method of assessment that involves the evaluation of an organized collection of materials developed by a learner that records learning achievements and relates them to personal, educational, or occupational goals, in this case, achievement of stated learning outcomes of college courses or programs.

Program of instruction: a group of related courses leading to a diploma, certificate, or other document awarded by the board of governors.

Program standard: a document produced by the ministry that sets out the essential learning that a student must achieve before being deemed ready to graduate. A program standard applies to all programs of instruction in an identified category regardless of the funding source and, for most programs, consists of a vocational standard, a generic skills standard, and general education requirements. Prior to graduation, students must achieve all three parts of the program standard.

Binding Policy Directive

A. Authority to Approve Programs

The board of governors of a college is to approve programs of instruction, consistent with Section D below, to achieve a comprehensive program of career-oriented postsecondary education and training offered by the college, consistent with the college’s mandate and overall strategic direction, the economic and social needs of its local and diverse communities, and government directions and priorities.

B. Credentials Awarded for Successful Completion of Programs of Instruction

A college is to award credentials at the successful completion of programs of instruction consistent with the attached Credentials Framework (see Appendix A).

C. Advisory Committees
The board of governors is to ensure that an advisory committee for each program of instruction or cluster of related programs offered at the college is established and is made up of a cross-section of persons external to the college who have a direct interest in and a diversity of experience and expertise related to the particular occupational area addressed by the program. The board of governors is to establish in by-law the structure, terms of reference, and procedures for program advisory committees.

D. Programs of Instruction

I. All programs of instruction with similar outcomes and credentials are to have the same title.

II. Programs of instruction are to include, along with the vocational outcomes relevant to the particular industry, field of study, business, or profession, the applicable outcomes for generic employability skills and general education as outlined in the Credentials Framework in Appendix A, and further expanded in Appendix B and Appendix C.

III. When a college chooses to deliver a program of instruction for which a Ministry of Training, Colleges and Universities program standard exists, the program must meet all the requirements of the program standard.

IV. Colleges are to establish a system-wide credentials validation service that will provide reasonable assurance that all postsecondary programs of instruction leading to one of the following credentials – Ontario College Certificate, Ontario College Diploma, Ontario College Advanced Diploma, or Ontario College Graduate Certificate (or the French-language equivalent) – offered by the colleges, regardless of funding source, conform to the Credentials Framework and are consistent with accepted college system nomenclature/program titling principles.

V. Prior learning assessment and recognition (PLAR) is to be made available for as many credit courses as possible in programs of instruction in which enrolment is eligible for funding through the general purpose operating grant. If a credit course is to be excluded from PLAR, the reasons and considerations should be clearly documented for the student.
Information on the PLAR process is to be made available to the public in the college central admissions publication and posted on the college’s web site.

VI. Colleges are to have protocols in place for students regarding grading, advancement, and dispute resolution. These protocols must be clearly articulated and provided to all students and college staff by posting the protocols on the college web site and by allowing people who do not have Internet access to obtain a copy of the protocols.

E. Applied Degrees

Pursuant to the Post-secondary Choice and Excellence Act, 2000, colleges may offer applied degrees as authorized by consent of the Minister of Training, Colleges and Universities and consistent with the Act and any terms and conditions stipulated in the consent.

F. Quality Assurance

I. Colleges are to establish mechanisms for the review of their programs of instruction to ensure ongoing quality, relevancy, and currency. A college’s policy on quality assurance for programs of instruction is to be publicly available.

II. If there is a legal requirement for graduates in a program to be certified, registered, licensed or granted some other form of official recognition by an regulatory authority that is authorized by Ontario law to grant such certification, registration, license or other form of recognition, in order for the graduate to work in the occupation in Ontario or use an occupational title, the college shall not offer the program, except with the consent of the Minister, unless:

(a) the program has been accredited or approved by the relevant regulatory authority; or

(b) the regulatory authority has formally acknowledged to the college that the program graduates are eligible to write any certifying or registration exam required by the regulatory authority or the program is otherwise recognized by the regulatory authority for the purposes of certifying or registering a graduate.
G. Programs Offered Through Partnerships or Other Arrangements with Other Postsecondary Education Institutions

I. Colleges offering programs in partnership or through other arrangements with other postsecondary education institutions, including private career colleges, must clearly indicate the nature of these partnerships or arrangements on all communications and materials prepared by the college and the other institution.

II. Students enrolled in programs offered through these partnerships or arrangements are students of the college and are entitled to all the rights and privileges accorded to other students of the college, regardless of the location of the program delivery.

H. Program Accreditation or Recognition by Voluntary External Bodies

A college may seek to have a program accredited or recognized by a voluntary external body. If a college does seek such accreditation or recognition the college shall not communicate or advertise, directly or indirectly, with respect to such accreditation or recognition unless the program has been formally accredited or recognized by the body and such accreditation or recognition remains in good standing.

For the purpose of this directive, a voluntary external body is an accrediting body or other body which has no legislative authority to require program accreditation or recognition, whether as a condition of graduate employment or membership in the body.

I. Advertising and Marketing

1. All advertising and marketing about college programs must be consistent with the requirements set out in Appendix D.

2. The board of governors of a college shall ensure that the college has established:

   (a) a mechanism to ensure that all marketing relating to its programs, whether undertaken directly by the college or indirectly by persons or entities acting on the college’s behalf or in partnership or other arrangement with the college, reflects accurate and comprehensive representation of the program or programs; and
(b) a process to receive and review complaints regarding college advertising and marketing of college programs consistent with Appendix D.

Summary of Responsibilities

Colleges of Applied Arts and Technology

The board of governors is responsible for:

- Approving the programs of instruction a college will offer.
- Ensuring that programs of instruction are developed and implemented consistent with provincial standards where they exist.
- Ensuring that all new and modified postsecondary programs of instruction leading to one of the following credentials – Ontario College Certificate, Ontario College Diploma, Ontario College Advanced Diploma, or Ontario College Graduate Certificate (or the French-language equivalent) – receive system-wide validation that the programs of instruction conform to the Credentials Framework and are consistent with accepted college system nomenclature / program titling principles.
- Ensuring that credentials awarded to students on successful completion of their respective programs of instruction are consistent with the Credentials Framework.
- Ensuring that program advisory committees are established.
- Ensuring that protocols for grading, advancement, and dispute resolution are established and publicly communicated.
- Ensuring that programs of instruction offered by the college are reviewed and revised on an ongoing basis.
- Ensuring that college communications, advertising and marketing meet the requirements of this Directive, including ensuring that the requirements set out in the College Advertising and Marketing Guidelines and the accountability requirements contained in Appendix D are complied with.
Ministry of Training, Colleges and Universities

The ministry is responsible for:

- Working with the college system in monitoring the programs of instruction offered in the system to ensure that the mandate of the system is fulfilled.

- Maintaining the Credentials Framework, including the essential employability skills and general education policy, in consultation with the colleges.

- Developing, reviewing, and approving program standards in consultation with the colleges and external stakeholders.
Appendix A: Credentials Framework

A college is to award credentials at the successful completion of programs of instruction consistent with the Credentials Framework detailed on the following pages.
This framework represents the minimum provincial requirement for credentials to be awarded and applies to all programs of instruction, regardless of funding source.

<td></td>
</tr>
</tbody>
</table>

### 2. Typical Duration for Completion

Specific design, delivery, and duration of curriculum is locally determined and may vary among programs and disciplines, recognizing that some colleges may use a system other than hours (e.g., credits) to determine program completion.

It is understood that a range of hours may apply to the achievement of program learning outcomes leading to any particular credential.

This framework outlines the typical duration of a program at this level for students entering with the minimum admission requirements.

Appendix B: Essential Employability Skills

Context

“Essential Employability Skills (EES) are skills that, regardless of a student’s program or discipline, are critical for success in the workplace, in day-to-day living, and for lifelong learning.¹”

The teaching and attainment of these Essential Employability Skills (EES) for students in, and graduates from, Ontario’s colleges of applied arts and technology are anchored in a set of three fundamental assumptions:

- These skills are important for every adult to function successfully in society today.
- Our colleges are well equipped and well positioned to prepare graduates with these skills.
- These skills are equally valuable for all graduates, regardless of the level of their credential, whether they pursue a career path, or they pursue further education.

Skill Categories

To capture these skills, the following six categories define the essential areas where graduates must demonstrate skills and knowledge.

- Communication
- Numeracy
- Critical Thinking & Problem Solving
- Information Management
- Interpersonal
- Personal

¹ As defined by the ACCC /HRDC EES committee July,’03
## Application / Implementation

In each of the six skill categories, there are a number of defining skills, or sub skills, identified to further articulate the requisite skills identified in the main skill categories. The following chart illustrates the relationship between the skill categories, the defining skills within the categories, and learning outcomes to be achieved by graduates from all postsecondary programs of instruction that lead to an Ontario College credential.

EES may be embedded in General Education or vocational courses, or developed through discrete courses. However these skills are developed, all graduates with Ontario College credentials must be able to reliably demonstrate the essential skills required in each of the six categories.

Appendix C: General Education Requirement

Purpose

The purpose of General Education in the Ontario college system is to contribute to the development of citizens who are conscious of the diversity, complexity, and richness of the human experience; who are able to establish meaning through this consciousness; and, who, as a result, are able to contribute thoughtfully, creatively, and positively to the society in which they live and work.

General Education strengthens student’s generic skills, such as critical analysis, problem solving, and communication, in the context of an exploration of topics with broad-based personal and / or societal importance.

Themes

The following themes will be used to provide direction to colleges in the development and identification of courses that are designed to fulfill the General Education requirement for programs of instructions:

- Arts in Society
- Civic Life
- Social and Cultural Understanding
- Personal Understanding
- Science and Technology

Appendix C1 that follows provides statements of rationale and offers suggestions related to more specific topic areas that could be explored within each theme. These suggestions are neither prescriptive nor exhaustive. They are included to provide guidance regarding the nature and scope of content that would be judged as meeting the intent and overall goals of General Education.

Courses

It is understood that the discrete courses developed and offered to deliver General Education will include measurable outcomes that provide evidence of student achievement. Typically, students’ achievement is demonstrated by their ability to apply
these specific learning experiences to a broader understanding of the themes under study.

**Requirement**

The General Education requirement for programs of instruction is stipulated in the Credentials Framework (Appendix A in the Minister’s Binding Policy Directive Framework for Programs of Instruction).

While the inclusion of General Education is locally determined for programs of instruction leading to either a college certificate or an Ontario College Certificate, it is recommended that graduates of the Ontario College Certificate programs have been engaged in learning that incorporates some breadth beyond the vocational field of study.

In programs of instruction leading to either an Ontario College Diploma or an Ontario College Advanced Diploma, it is required that graduates have been engaged in learning that exposes them to at least one discipline outside their main field of study, and increases their awareness of the society and culture in which they live and work. This will typically be accomplished by students taking 3 – 5 courses offered and designed discretely and separately from vocational learning opportunities (courses).

These learning opportunities would normally be delivered using a combination of required and elective processes. Further clarification is provided in Appendix C2 Questions and Answers related to the implementation of the general education policy in programs of instructions in colleges of applied arts and technology in Ontario.
Appendix C1: Themes for Courses Developed to Provide General Education

Theme 1. Arts In Society

Rationale:

The capacity of a person to recognize and evaluate artistic and creative achievements is useful in many aspects of his/her life. Since artistic expression is a fundamentally human activity, which both reflects and anticipates developments in the larger culture, its study will enhance the student's cultural and self-awareness.

Content:

Courses in this area should provide students with an understanding of the importance of visual and creative arts in human affairs, of the artist's and writer's perceptions of the world and the means by which those perceptions are translated into the language of literature and artistic expression. They will also provide an appreciation of the aesthetic values used in examining works of art and possibly, a direct experience in expressing perceptions in an artistic medium.

Theme 2. Civic Life

Rationale:

In order for individuals to live responsibly and to reach their potential as individuals and as citizens of society, they need to understand the patterns of human relationships that underlie the orderly interactions of a society’s various structural units. Informed people will have knowledge of the meaning of civic life in relation to diverse communities at the local, national, and global level, and an awareness of international issues and the effects of these on Canada, and Canada’s place in the international community.

Content:

Courses in this area should provide students with an understanding of the meaning of freedoms, rights, and participation in community and public life, in addition to a working knowledge of the structure and function of various levels of government (municipal, provincial, national) in Canada and/or in an international context. They may also provide an historical understanding of major political issues affecting relations between the various levels of government in Canada and their constituents.
Theme 3. Social and Cultural Understanding

Rationale:

Knowledge of the patterns and precedents of the past provide the means for a person to gain an awareness of his or her place in contemporary culture and society. In addition to this awareness, students will acquire a sense of the main currents of their culture and that of other cultures over an extended period of time in order to link personal history to the broader study of culture.

Content:

Courses in this area are those that deal broadly with major social and cultural themes. These courses may also stress the nature and validity of historical evidence and the variety of historical interpretation of events. Courses will provide the students with a view and understanding of the impact of cultural, social, ethnic, or linguistic characteristics.

Theme 4. Personal Understanding

Rationale:

Educated people are equipped for life-long understanding and development of themselves as integrated physiological and psychological entities. They are aware of the ideal need to be fully functioning persons: mentally, physically, emotionally, socially, spiritually, and vocationally.

Content:

Courses in this area will focus on understanding the individual: his or her evolution; situation; relationship with others; place in the environment and universe; achievements and problems; and his or her meaning and purpose. They will also allow students the opportunity to study institutionalized human social behaviour in a systematic way. Courses fulfilling this requirement may be oriented to the study of the individual within a variety of contexts.

Theme 5. Science And Technology

Rationale:

Matter and energy are universal concepts in science, forming a basis for understanding the interactions that occur in living and non-living systems in our universe. Study in this
area provides an understanding of the behaviour of matter that provides a foundation for further scientific study and the creation of broader understanding about natural phenomena.

Similarly, the various applications and developments in the area of technology have an increasing impact on all aspects of human endeavour and have numerous social, economic, and philosophical implications. For example, the operation of computers to process data at high speed has invoked an interaction between machines and the human mind that is unique in human history. This development and other technological developments have a powerful impact on how we deal with many of the complex questions in our society.

**Content:**

Courses in this area should stress scientific inquiry and deal with basic or fundamental questions of science rather than applied ones. They may be formulated from traditional basic courses in such areas of study as biology, chemistry, physics, astronomy, geology, or agriculture. As well, courses related to understanding the role and functions of computers (e.g., data management and information processing), and assorted computer-related technologies, should be offered in a non-applied manner to provide students with an opportunity to explore the impact of these concepts and practices on their lives.
Appendix C2: Questions and Answers

The following series of Questions and Answers is offered as an attempt to provide clarity of understanding and ease of implementation of the General Education requirement for programs of instruction offered by colleges of applied arts and technology in Ontario and leading to one of the following credentials: Ontario College Certificate, Ontario College Diploma, or Ontario College Advanced Diploma. It is not presented as an exhaustive list.

1. Why is there a new general education policy?

Under the Minister’s Binding Policy Directive Framework for Programs of Instruction, released effective April 1, 2003 to support the Ontario Colleges Applied Arts and Technology Act, 2002, certain initial changes to the previous policy were noted. Specifically, the policy changes were noted as:

- in Ontario College Certificate (one-year) programs there is an expression of the desirability that students have exposure to general education that incorporates some breadth beyond the vocational field of study, along with the removal of the requirement for one 45-hour course per semester; and,

- in Ontario College Diploma and Ontario College Advanced Diploma (two-year and three-year) programs, while maintaining the requirement for some discretely designed general education learning opportunities (i.e., 3 – 5 courses), the requirement for one 45-hour course per semester is removed.

This was an initial step in the re-articulation of the requirement on General Education. At the same time the Ministry of Training, Colleges and Universities undertook to work cooperatively with the Coordinating Committee of Vice-Presidents, Academic to further update the general education requirement in light of the Credentials Framework, by updating and re-articulating the goals and objectives originally established in 1994.

2. What is different under the new general education policy?

There is a re-articulation of the purpose and goals of General Education in colleges of applied arts and technology in Ontario.

There is a change (from 8 to 5) in the number of broad goal areas, now described as themes, to assist colleges in the development, identification, and delivery of courses designed to fulfill the General Education requirement.
There is no longer a mandated time requirement (i.e., one 45-hour course per semester) attached to courses used to deliver General Education.

As noted above, there is a change in the requirement of having courses of a prescribed number of hours throughout a program of instruction. In programs of instruction leading to an Ontario College Certificate (a program that would be considered as a one-year post-secondary program), there is room for a college to determine, locally, whether or not to have discrete courses in their programs.

In programs of instruction leading to an Ontario College Diploma or an Ontario College Advanced Diploma, the requirement is to have students engage in 3-5 discrete courses in an area of study that is outside their chosen vocational field of study.

3. The credentials framework says that for general education in Ontario college diploma and Ontario college advanced diploma programs, “…this will typically involve students taking 3-5 courses (or the equivalent)…”. What does this mean?

In some colleges student progress is expressed through an accumulation of ‘credits’ rather than ‘courses’. There is no standard measure for ‘credits’ as used in this context. As a result, a college is expected to provide students with learning opportunities outside their chosen field of vocational study that would be equivalent to 3 – 5 courses. For example, if a college expressed successful completion of a course as being worth 3 credits, a student would have to accumulate a total of 9 to 15 credits to meet the ‘equivalent of 3-5 courses’.

4. Does a college have to have one course delivering general education in each semester, or could they be ‘clustered’?

The requirement is that students are engaged in learning that exposes them to at least one discipline outside their main field of study. The requirement for this to be done in 3-5 courses applies to the entire program of study. As such, the courses developed to deliver General Education may be offered at any point throughout the program of instruction.

5. Can either discipline-specific or interdisciplinary courses be used to deliver general education?

As with the previous policy, courses and their learning outcomes may be drawn from either a specific discipline, or from across disciplines. Courses developed or used to deliver General Education provide a vehicle for an increased depth of understanding of a broad topic area, and are not intended to develop proficiency in specific applied skills.
For example, a course developed under the theme of Arts in Society may include experimentation with painting in order to provide students with a firsthand experience with the challenges and accomplishments of the artist under study, and not primarily for the purpose of developing painting skills.

6. How many of the five themes must be addressed through courses developed to deliver general education?

Students are to be exposed to at least one discipline outside their main field of study so as to increase their awareness of the society and culture in which they live and work. Although students are encouraged to develop life-long learning habits and pursue areas of interest, of equal importance is the need to expand those areas. In order to achieve an appropriate level of breadth, students are encouraged to select courses in more than one theme. The achievement of breadth is dependent on colleges having sufficient offerings and the students being able and required to take advantage of them.
Appendix D: College Advertising and Marketing Guidelines

I. Overview

It is the Ministry’s expectation that all college advertising and marketing should primarily focus on college programs.

All college advertising and marketing must be transparent and accurate and conform to the following guidelines, which are based on the Canadian Code of Advertising Standards.

A. Accuracy and Clarity

(a) Advertising and marketing must not contain inaccurate or deceptive claims, statements, illustrations or representations, either direct or implied, with regard to a program. In assessing the truthfulness and accuracy of a message, the concern is not with the intent of the sender or precise legality of the presentation. Rather, the focus is on the message as received or perceived, i.e. the general impression conveyed by the advertising or marketing.

(b) Advertising and marketing must not omit relevant information in a manner that, in the result, is deceptive.

(c) All pertinent details of a program, including abilities required to complete the program, must be clearly and understandably stated.

(d) Disclaimers and asterisked or footnoted information must not contradict more prominent aspects of the message and should be located and presented in such a manner as to be clearly visible and/or audible.

(e) Both in principle and practice, all advertising and marketing claims and representations must be supportable. Supporting information should be kept on file and be readily available for review.
B. Program Costs

No advertising or marketing shall include deceptive claims regarding program costs.

C. Guarantees

No advertising or marketing shall offer a guarantee of employment, employment opportunities or job placement, unless such guarantees can be verified.

D. Testimonial Advertising

Testimonials, endorsements or representations of opinion or preference, must reflect the genuine, reasonably current opinion of the individual(s), group or organization making such representations, and must be based upon adequate information about or experience with the program being advertised, and must not otherwise be deceptive.

II. Limitations on Advertising and Marketing of College Programs

Ministry funded programs that have not received funding approval by the Ministry may not be advertised in advance of that approval, nor may students be accepted into an unapproved program.

A college may not advertise or market a program subject to the Directive set out in Section F, II, except with the prior approval in writing of the Ministry.

A college may not advertise or market the accreditation or recognition of a program by a voluntary external body except in accordance with Section H of the Directive.

III. Accountability

Each college shall establish a process to receive and review complaints regarding advertising and marketing of college programs.

A college shall respond to any such complaints in a timely fashion and shall provide a summary of such complaints in its annual report, including information regarding number of complaints received, how they were disposed of, and the time frame involved. For details see the Annual Report Operating Procedure.
