Area of Interest: Environmental Science

Urban Forestry - Arboriculture

Ontario College Certificate

1 Year

Pembroke Campus

Academic Year: 2020/2021
Program Code: 1214X01FPM

Our Program

Provide environmental, social and economic benefits in today’s society with a career in urban forestry.

In the one-year Urban Forestry - Arboriculture Ontario College Certificate program, you experience a hands-on education exploring arboriculture science with tree care skills.

You acquire the skills and knowledge related to a range of tree care services provided by professional arborists, including:

• tree climbing
• tree identification
• tree pruning
• tree removal
• tree care
• tree planting
• identification, diagnoses and management of tree diseases

 Spend the majority of your time in the program outdoors, in a variety of weather conditions and heights. Working on real trees, practice climbing techniques and learn to become proficient in the use of arborist-related equipment including chainsaws, chippers and pruning essentials.

Develop foundational tree identification and safe tree climbing skills through theoretical, laboratory and hands-on learning.

Participate in workplace scenarios that replicate actual challenges faced by arborists. In classroom and labs settings, examine tree science and arboriculture practises, such as planting, pruning and removal.

Graduates may find a career as a(n):

• lead arborist
• crew leader
• arborist
• arborist assistant
• climber
• apprentice climber
• consulting arborist
• ground crew
There are employment opportunities in a wide variety of areas such as:

- commercial tree service companies
- public utility companies
- city, county, and other government agencies
- landscape maintenance firms
- nurseries
- garden centres
- industrial complexes
- private estates
- theme parks and resorts
- arboretums
- botanical gardens
- tree research centres
- golf courses

If you choose to pursue further education, you are ready to write the College of Trades (COT) exemption exams for some college courses.

SUCCESS FACTORS

This program is well-suited for students who:

- Enjoy physical activity and working outdoors.
- Are willing to work in extreme weather conditions.
- Are comfortable workings at heights exceeding 25M (80 feet).
- Are able to lift one’s own weight.
- Have an affinity to working with trees and shrubs.
- Work well in a team environment.
- Enjoy problem solving.
- Possess good communication skills.

Employment

Graduates of the program may find employment as Head Arborist, Crew Leader, Arborist, Arborist Assistant, Climber, Apprentice Climber, Consulting Arborist and Ground Staff.

Learning Outcomes

The graduate has reliably demonstrated the ability to:

- Explain principles and procedures relating to urban forests and ecosystems to inform clients’ decision-making when selecting tree sites, species and planting procedures.
- Treat trees by considering the relationship between tree anatomy, physiology and urban soil conditions to maintain tree health and management.
- Recommend and apply integrated treatments and preventative care to promote healthy trees.
• Use complex climbing systems with basic industry-recognized fall protection techniques to climb and prune trees safely while addressing tree wound reactions in juvenile and mature trees.

• Implement proper tree maintenance and safe removal procedures in accordance with industry standards, policies, and legislation.

• Employ safe operational and maintenance procedures for arborist-related hand tools and large equipment in accordance with recognized standards.

• Prepare reports and field records in compliance with industry regulation and established policies and procedures.

• Utilize industry related personal protective equipment and safe working practises to ensure optimum health and safety of self, team members and the environment.

• Apply the fundamentals of hazardous tree assessment, tree appraisal and tree risk management in order to implement safe and appropriate harm reduction actions and procedures.

• Identify and apply discipline-specific practices that contribute to the local and global community through social responsibility, economic commitment and environmental stewardship.

Fees for the 2020/2021 Academic Year

Tuition and related ancillary fees for this program can be viewed by using the Tuition and Fees Estimator tool at [https://www.algonquincollege.com/fee-estimator](https://www.algonquincollege.com/fee-estimator).

Further information on fees can be found by visiting the Registrar’s Office website at [https://www.algonquincollege.com/ro](https://www.algonquincollege.com/ro).

Fees are subject to change.

Additional program related expenses include:

Students should plan on spending approximately $1,200 for study materials, personal protective equipment and small tools. Note also that transportation to and from off-campus work sites, within or in the vicinity of the City of Pembroke, is not included in these costs and is the responsibility
of the student.

**Admission Requirements for the 2021/2022 Academic Year**

**College Eligibility**

- Ontario Secondary School Diploma (OSSD) or equivalent. Applicants with an OSSD showing senior English and/or Mathematics courses at the Basic Level, or with Workplace or Open courses, will be tested to determine their eligibility for admission; OR
  - Academic and Career Entrance (ACE) certificate; OR
  - General Educational Development (GED) certificate; OR
- Mature Student status (19 years of age or older and without a high school diploma at the start of the program). Eligibility may be determined by academic achievement testing for which a fee of $50 (subject to change) will be charged.

**Program Eligibility**

- English, Grade 12 (ENG4C) or equivalent with a grade of 60% or higher.
- Applicants with international transcripts must provide proof of the subject specific requirements noted above and may be required to provide proof of language proficiency. Domestic applicants with international transcripts must be evaluated through the International Credential Assessment Service of Canada (ICAS) or World Education Services (WES).
  - IELTS-International English Language Testing Service (Academic) Overall band of 6.5 with a minimum of 6.0 in each band; OR TOEFL-Internet-based (iBT)-overall 88, with a minimum of 22 in each component: Reading: 22; Listening: 22; Speaking: 22; Writing: 22.

Should the number of qualified applicants exceed the number of available places, applicants will be selected on the basis of their proficiency in English.

**Admission Requirements for 2020/2021 Academic Year**

**College Eligibility**

- Ontario Secondary School Diploma (OSSD) or equivalent. Applicants with an OSSD showing senior English and/or Mathematics courses at the Basic Level, or with Workplace or Open courses, will be tested to determine their eligibility for admission; OR
  - Academic and Career Entrance (ACE) certificate; OR
  - General Educational Development (GED) certificate; OR
- Mature Student status (19 years of age or older and without a high school diploma at the start of the program). Eligibility may be determined by academic achievement testing for which a fee of $50 (subject to change) will be charged.

**Program Eligibility**

- English, Grade 12 (ENG4C) or equivalent with a grade of 60% or higher.
- International applicants must provide proof of the subject specific requirements noted above along with proof of either: (IELTS / TOEFL) IELTS-International English Language Testing Service (Academic) Overall band of 6.5 with a minimum of 6.0 in each band; OR TOEFL-Internet-based (iBT)-overall 88, with a minimum of 22 in each component: Reading: 22; Listening: 22; Speaking: 22; Writing: 22.

Should the number of qualified applicants exceed the number of available places, applicants will be selected on the basis of their proficiency in English and mathematics.

**Application Information**
Applications to full-time day programs must be submitted with official transcripts showing completion of the academic admission requirements through:

ontariocolleges.ca  
60 Corporate Court  
Guelph, Ontario N1G 5J3  
1-888-892-2228

Students currently enrolled in an Ontario secondary school should notify their Guidance Office prior to their online application at http://www.ontariocolleges.ca/.

Applications for Fall Term and Winter Term received by February 1 will be given equal consideration. Applications received after February 1 will be processed on a first-come, first-served basis as long as places are available.

International applicants please visit this link for application process information: https://algonquincollege.force.com/myACint/.

For further information on the admissions process, contact:

Registrar’s Office  
Algonquin College in the Ottawa Valley  
1 College Way  
Pembroke, ON K8A0C8  
Local: 613-735-4700  
Toll-free 1-800-565-4723  
TTY: 1-866-620-3845  
Fax: 613-735-4739

Additional Information

Programs at Algonquin College are Bring Your Own Device (BYOD). To see the BYOD requirements for your program, please visit: https://www7.algonquincollege.com/byod/.

First Aid and CPR:
A current Standard First Aid and CPR certificate is preferred prior to registration. Otherwise, the student must obtain the certificate within the first two months of the first semester.

Advanced Standing:
Algonquin College graduates of the Ontario College Certificate ‘Urban Forestry - Arboriculture’ program may be eligible for admission with Advanced Standing for a maximum of 8 courses in the Forestry Technician Diploma program. On the basis of the review/evaluation, a program of study will be prescribed, identifying the entry point within the program and the courses that must be successfully achieved to attain graduation status in the Forestry Technician Diploma.

For more information on advanced standing, please contact Peter Arbour, Program Coordinator Forestry Technician program, arbourp@algonquincollege.com.

For more information on the Urban Forestry - Arboriculture Certificate, please contact Kris Vande Sompel, Program Coordinator, vandesk@algonquincollege.com.

Course Descriptions

ENL7777 Communications I

Communication remains an essential skill sought by employers, regardless of discipline or field of study. Using a practical, vocation-oriented approach, students focus on meeting the requirements of effective communication. Students practise writing, speaking, reading, listening, locating and documenting information, and using technology to communicate professionally. Students develop and strengthen communication skills that contribute to success in both educational and workplace environments.

Prerequisite(s): none
FOR7101 Basic Tree Climbing
The ability to climb trees is one of the most important skills an arborist can possess. Students learn the skills to safely use specialized arborist equipment, such as climbing harnesses and ropes. Training includes pre-climb inspection of trees and equipment, techniques for ascending, descending, maneuvering within a tree’s canopy and aerial rescue procedures. Students become proficient climbers through climbing demonstrations and applied practice.

Prerequisite(s): none
Corequisite(s): none

FOR7102 Equipment Operations and Maintenance
The proper use and maintenance of specialized equipment increases productivity and significantly reduces the risks to Arborists in the workplace. In this course, you will learn tree felling techniques as well as chainsaw maintenance and safe methods to service brush chippers and chainsaws. You will work hands-on in the field, felling trees and operating a wood chipper, as well as practicing machinery maintenance in the lab. This course also exposes you to additional machinery and equipment that Arborists operate in the workplace such as stump grinders, winches, brush saws and cranes.

Prerequisite(s): none
Corequisite(s): none

FOR7103 Tree Sciences and Practices
Applying the concepts and principles of the science behind trees is important when managing the health of trees. Students gain an overview of tree sciences such as anatomy and physiology. Focus is on urban soil conditions, tree installation and the impact nearby construction can have on trees. Students are exposed to the practices by which arborists select, plant and prune trees, as well as how to assess hazards posed by trees.

Prerequisite(s): none
Corequisite(s): none

FOR7106 Advanced Tree Climbing
Students further hone their tree climbing abilities, while acquiring more advanced climbing systems and techniques. Always focusing on safety, students use equipment such as split tails, friction savers and re-directs. Students also gain experience pruning trees aloft using specialty hand tools. Demonstrations by instructors and rigorous continued practice further develop these skills.

Prerequisite(s): FOR7101
Corequisite(s): none

FOR7107 Arboriculture Practices
In an urban setting, Arborists are required to perform inspections and produce reports for a variety of client needs. Arborists have the authority to diagnose and advise on tree issues and problems. Arborists are furthermore qualified to assess trees and apply for tree removal permits. Many different scenarios exist where an Arborist is required to perform a consulting role. As experts in this field, we may be required to defend our diagnosis in a court of law and are considered “expert witnesses” in these cases. This course will allow you to perform some of these specialized assessments, and to make use of the data you collect. A critical time that often dictates a tree’s survival is the time of planting. You will learn proper planting techniques as well as reinforce your juvenile pruning skills.

Prerequisite(s): none
Corequisite(s): none
FOR7108 Tree Removal

In an urban setting with overhead wires, proximity to buildings and tight spaces, tree removal is a complicated matter. Students develop action plans to perform these operations safely and without damage to property by applying the latest tree removal techniques. Through case studies, demonstrations and continuous practice, students build confidence and proficiency in this complicated task.

Prerequisite(s): FOR7106
Corerequisite(s): none

FOR7109 Forest Entomology and Pathology

Now more than ever our urban forest is at risk from a multitude of insects and diseases. As tree care specialists, it is important to be aware of today's main forest threats, and to be able to manage them wherever possible. Students identify and discuss current insect and pathogen threats to our urban forests. Through classroom study and sample collections, students begin to develop an encyclopedic knowledge of these threats.

Prerequisite(s): none
Corerequisite(s): none

FOR7110 Urban Soils

The root system is undeniably the most important part of plants, yet rarely is any thought given to the conditions it endures. Students examine the differences between urban and natural soil types and methods of enriching urban soils to promote healthy root systems. The selection of appropriate tree species for specific sites is also discussed. Proper species selection is discussed as well. Through case studies and examples, students develop their knowledge of soil types and their root environment.

Prerequisite(s): none
Corerequisite(s): none

FOR7114 Dendrology

Recognizing tree species and their attributes are an essential skill for diagnosing and planning care. Classrooms and study labs develop strong identification skills, while field trips re-enforce the skill set in an authentic context. Students learn to identify approximately 150 tree and shrub specimens that are commonly found in Ontario's urban settings.

Prerequisite(s): none
Corerequisite(s): none

FOR7115 Tree Pruning Techniques

As with many artforms, pruning is founded in strong, science-based technique. It is often left up to the individual to make critical decisions, which could enhance or decrease the likelihood of a tree living a full lifespan. In this course, you will learn about how a tree reacts to pruning. Emphasis is placed on strategic planning, proper pruning cuts and techniques. Most time is spent in the field practicing result-specific pruning techniques such as structural pruning, aesthetic pruning, crown thinning, clearance pruning, pruning for fruit production, etc. This course will equip you with the knowledge and expertise to make those critical decisions with confidence.

Prerequisite(s): FOR7106
Corerequisite(s): none

GED1214 General Education Elective

Students choose one course, from a group of general education electives, which meets one of the following five theme requirements: Arts in Society, Civic Life, Social and Cultural Understanding, Personal Understanding, and Science and Technology.
Prerequisite(s): none
Corerequisite(s): none
